See how iharmony zoning can boost your sales and grow your business

	How it benefits your business	How it benefits your customers
Heats and cools up to four separate areas in the home	<ul style="list-style-type: none"> <li>• Allows you to meet the needs of customers with heating and cooling challenges</li> <li>• Works with high-efficiency Dave Lennox Signature® Collection equipment</li> </ul>	<ul style="list-style-type: none"> <li>• Delivers a new level of home comfort not possible with a single-zone system</li> <li>• Has the power to significantly reduce utility bills</li> </ul>
Compatible with icomfort Wi-Fi® thermostat	<ul style="list-style-type: none"> <li>• Provides competitive differentiation</li> <li>• Reduces installation time with quick and easy setup</li> </ul>	<ul style="list-style-type: none"> <li>• Offers greater convenience and control</li> <li>• Improves overall satisfaction</li> </ul>

**Making a home both comfortable and energy efficient is no longer a challenge thanks to the iharmony Zoning System.** By precisely directing airflow to up to four separate areas, it ideally suits different temperature preferences, while keeping energy costs at an absolute minimum. For added convenience and control, in-zone thermostats let homeowners override preprogrammed settings at the touch of a button. Best of all, iharmony zoning works with the icomfort Wi-Fi thermostat, so your **customers can enjoy remote access and energy-saving features—while you enjoy one of the easiest installations in the industry.**

## iharmony zoning is an ideal solution for almost any heating or cooling challenge

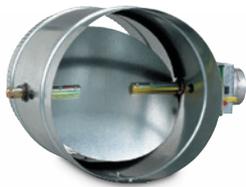

Suggest iharmony zoning to your customer if they have:

- Large windows in their home
- Top floor that's always warmer than lower floors
- House level that's partially or completely underground
- Rooms they seldom use or that feel stuffy
- Room that was added since their HVAC system was installed
- Home office with electronic equipment
- Family members with different temperature needs
- High heating and cooling bills

## Perfect air in up to four different zones. Easy as one-two-three.

The three components of the iHarmony Zoning System work together to deliver everything customers want—greater comfort, energy efficiency, convenience and control.

### Motorized dampers optimize airflow

- Easily installed in existing ductwork
- Act like shutoff valves, opening and closing as needed to control airflow in each zone
- Work automatically to maintain desired temperatures based on signals from thermostats

### In-zone thermostats offer one-touch control

- Streamlined design is compatible with any décor
- Touch controls let homeowners adjust preprogrammed settings with a simple tap
- Built-in sensors continually monitor the temperature and communicate with the icomfort Wi-Fi thermostat

### icomfort Wi-Fi thermostat keeps programming simple

- Functions as the system's command center, providing detailed information for all zones in one convenient location
- Allows homeowners to program a different schedule for every day of the week and for every zone
- Remote capabilities let homeowners alter settings from anywhere using a mobile phone, smart tablet or laptop

### Energy innovation

iHarmony zoning lets you offer what homeowners want most—utility savings. By cutting back on heating and cooling unoccupied areas of the home, a zoning system can reduce energy costs by up to 35%.

### Comfort goes mobile

**Free to download** for Apple and Android devices, the icomfort App is like a touchscreen window into home comfort. Whether your customers are on the road or on the couch, the app allows them to check and change temperature with only a touch.
